

U.S. Serial No.: 10/680,538

REMARKS

The undersigned has been requested by the assignee of the present application to review the above application. In the process of that review, numerous drafting errors have been discovered which are desired to be corrected before a patent issues based upon this application.

As an example, the recitation of claim 21 (which has been canceled) is already included in claim 53 and thus redundant, with claim 22 also being redundant to claim 54. Claim 7 was amended to provide proper antecedent basis (and claims 8 and 19 being similarly amended).

The cross reference was amended pursuant to MPEP § 201.11 IIIB to ensure that the expiration of the present application is based upon the filing date of the present application and not the provisional application.

The specification, claims, and abstract have been similarly amended to remove duplicate material, for proper grammar, for consistency, and similar reasons to place the above application in better condition for issuance.

As the above errors were recently discovered by the undersigned, the amendments place the application in better condition for allowance, and as the assignee should not be penalized due to any oversight of the prior attorneys in the drafting and prosecution of this application, it is respectfully requested that the present amendment be entered prior to the issuance of a patent based upon this application.

Respectfully submitted,

Bradley Jon VanderTuin et al.

Dated: April 26, 2006.
